

DOCKER CLI INSTALLATION

TEAM ID: PNT2022TMID21617

```
Administrator: Command Prompt
C:\Windows\System32>choco install docker-cli -y
Chocolatey v1.2.0
Installing the following packages:
docker-cli
By installing, you accept licenses for the packages.
Progress: Downloading docker-cli 20.10.21... 100%

docker-cli v20.10.21 [Approved]
docker-cli package files install completed. Performing other installation steps.
ShimGen has successfully created a shim for docker.exe
The install of docker-cli was successful.
Software installed to 'C:\ProgramData\chocolatey\lib\docker-cli'

Chocolatey installed 1/1 packages.
See the log for details (C:\ProgramData\chocolatey\logs\chocolatey.log).
C:\Windows\System32>
```

```
Administrator: Command Prompt
C:\Windows\System32>docker

Usage: docker [OPTIONS] COMMAND

A self-sufficient runtime for containers

Options:
  --config string      Location of client config files (default
                        "C:\\Users\\Deepan Surya Raj\\.docker")
  -c, --context string  Name of the context to use to connect to the
                        daemon (overrides DOCKER_HOST env var and
                        default context set with "docker context use")
  -D, --debug           Enable debug mode
  -H, --host list       Daemon socket(s) to connect to
  -l, --log-level string Set the logging level
                        ("debug"|"info"|"warn"|"error"|"fatal")
                        (default "info")
  --tls                Use TLS; implied by --tlsverify
  --tlscert string      Trust certs signed only by this CA (default
                        "C:\\Users\\Deepan Surya Raj\\.docker\\ca.pem")
  --tlscert string      Path to TLS certificate file (default
                        "C:\\Users\\Deepan Surya Raj\\.docker\\cert.pem")
  --tlskey string       Path to TLS key file (default
                        "C:\\Users\\Deepan Surya Raj\\.docker\\key.pem")
  --tlsverify           Use TLS and verify the remote
  -v, --version         Print version information and quit

Management Commands:
  builder      Manage builds
  config        Manage Docker configs
  container     Manage containers
  context       Manage contexts
  image         Manage Docker images
  manifest      Manage Docker image manifests and manifest lists
  network       Manage networks
  node          Manage Swarm nodes
  plugin        Manage plugins
  secret        Manage Docker secrets
  service       Manage services
```
